Y52 Drive Motor Technical Specification

1. Electrical Characteristics

Model: SIMO-Y52-400, Rated Output: 400 kW, Stator Current: 730 A, Power Factor: 0.88, Insulation Class: H. Maximum permissible temperature rise under continuous full load is 105 deg C.

2. Mechanical & Cooling Interface

Cooling type: IC416 with forced cooling blower fan. Bearing type drive end: 6326-C3, non-drive end: NU226-E. Shaft grounding brush must be inspected every 3 months.
