Y52 Hydraulic System Circuit Specification

1. Pressure Regulation Valves

Main proportional relief valve RV-01 maintains line pressure at 21.0 MPa +/- 0.5 MPa. Tank return filter DP-02 differential must not exceed 0.2 MPa.

2. Emergency Accumulator Bank

Piston accumulator ACC-01 is pre-charged with Dry Nitrogen (N2) to 14.5 MPa at 20 deg C. Verify pre-charge pressure annually using charging kit N2-KIT-52.
